ELEXIS- European Lexicographic Infrastructure

D7.4 Print Publicity

Deliverable Number:	D7.4
Dissemination Level:	Public
Delivery Date:	July 26, 2018
Version:	Final
Author(s):	Ondřej Matuška, Anna Woldrich

Project Acronym: ELEXIS

Project Full Title: European Lexicographic Infrastructure

Grant Agreement No.:   731015

## Deliverable/Document Information

Deliverable No.:   D7.4

Deliverable Title: Print Publicity

Author(s):   Ondřej Matuška,
Anna Woldrich

Dissemination Level: Public

Document History

Version/Date	Changes/Approval	Author/Approved by
V0.1 19/06/2018	First Draft	Ondřej Matuška
V0.2 20/06/2018	Feedback	Anna Woldrich
V0.3 21/06/2018	Review, Feedback	Ondřej Matuška, Anna Woldrich, Tanja Wissik, Miloš Jakubíček
V0.4 28/06/2018	Second Draft, New Layout	Ondřej Matuška
V0.5 03/07/2018	Feedback	Anna Woldrich
V0.6 04/07/2018	Review	Ondřej Matuška, Anna Woldrich,
V0.7 09/07/2018	Design proofs, Feedback	Ondřej Matuška
V0.8 10/07/2018	Final print proofs, Feedback	Ondřej Matuška
V0.9 26/07/2018	Final deliverable	Tanja Wissik

Building new dictionaries

ELEXIS will play a key role in building new dictionaries. While the project is not concerned with dictionary building itself, it will open the existing resources, digitize legacy data, develop new language tools and services and make them accessible in a network open to lexicographers, researchers, software developers and other communities. This interlinked infrastructure will facilitate fast building of high-quality dictionaries and databases.

'No one needs dictionaries anymore.'

ELEXIS: 'More people than ever before use dictionaries. Not so much printed ones, but dictionary data are now built into mobile phones, software, systems and are in use all the time. New and updated dictionaries are badly needed fast.'
Travel for research

ELEXIS offers **grants for research visits** to facilitate the mobility of researchers and maximise the availability of data, tools, services and resources.

Institutions available for visiting

Slovenia Institut Jozef Stefan (JSI)
The Netherlands Dutch Language Institute (INT)
Austria Austrian Academy of Sciences (OEAW)
Serbia Belgrade Center for Digital Humanities (BCDH)
Bulgaria Institute of Bulgarian Language Lyubomir Andreychin (IBL)
Hungary Hungarian Academy of Sciences (RILMTA)
Israel K Dictionaries (KD)
Denmark Det Danske Sprog- og Litteraturselskab (DSL) & University of Copenhagen (UCPH)
Germany Trier Center for Digital Humanities (TCDH)
Estonia Institute for Estonian Language (EKI)
Spain Real Academia Española (RAE)

EUROPE
the home of isolated dictionaries

Europe is the home of some of the greatest dictionaries and other lexicographic resources. But they are **isolated**. Linking them, digitizing, standardizing their formats and making them talk to each other will create a unique network aided by the latest language software and tools.

This is what ELEXIS aims to achieve.

Who is ELEXIS for?

ELEXIS aims to address the widest audience possible: from experts and academics to the general public and casual users in need of linguistic information and data.

Lexicographers & linguists

Enrich your own lexicographic data or benefit from the data provided by the whole community.

Technology experts

Improve the quality of your algorithms and applications with validated linked open language data.

Digital humanities experts

Use the new tools to explore your textual data and benefit from links to modern and historical resources.

Commercial entities

Join ELEXIS with an **observer status**, enhance your data by accessing our infrastructure, tools and services based on validated high quality data.

General public

Language enthusiasts, learners or teachers can benefit from new and updated dictionaries and digital language tools.

Gain access to tools and data

Academic institutions throughout the EU will have access to a variety of resources as they are developed and made available in the course of the project.

Find out what is available already!

ELEXIS Resources

ELEXIS will make available various lexicographic and linguistic resources such as:

- online dictionaries
- lexicographic databases
- digitized legacy dictionaries
- language tools and services

Some resources will need to be developed from scratch in the course of the project, some will be updated, upgraded, expanded and enriched before they will be made available. Some resources are available right from the start of the project.

See overleaf for the list of available resources.

Gain free access
via your institution.

SKETCH ENGiNE

Analyse preloaded text corpora or build your own in 90+ languages to learn how language works or to simply look up information about any word or phrase.

⟨ LEXONOMY ⟩

Build your own dictionaries or glossaries however big or small in this cloud-based open-source dictionary writing and online dictionary publishing platform. Benefit from the Sketch Engine and Lexonomy integration.
